

TYPICAL APPLICATION SCHEMATIC

EXAMPLE OF PRODUCT RANGE

Fusion Plast Australia are here to support you with a full package of products for your gas and water infrastructure project. For the full range visit our website www.fusionplast.com.au

New
Extended range
of electrofusion
elbows and tees

A NEW range of large diameter electrofusion elbows and equal tees
Sizes 200, 225 and 250mm | Elbows available in 90° and 45°

Electrofusion coupler
Sizes 20 - 630mm

Large diameter branch saddle (LDBS)
Simple, safe and cost-effective live connections on water and gas networks
Sizes 250 - 630mm | 150, 200 and 250 NP16 outlet size

Stub flange adaptor
Sizes range from 20 - 1200mm

Transition stub flange adaptor
Sizes range from 90 - 1200mm

Multiseal tapping tee
Delivering security, safety and speed at the point of installation
Stackload or underclamp
Sizes range from 40 - 355mm
20, 25, 32, 40, 50 and 63mm outlets

Series 570 resilient seated gate valve - WATER
Flanged gate valve for water, sewage and neutral liquid applications to max 70°C

Series 36 gate valve with PE pipe ends - WATER
Gate valve with PE pipe ends for water, sewage and neutral liquid applications to max 70°C

Series 57 resilient seated gate valve - COAL SEAM GAS
Resilient seat gate valve for coal seam gas water applications to max 70°C

Product G: Compatible with Fusion's large diameter branch saddle (LDBS) range to facilitate underpressure drilling installations.

SBOX Max - Electrofusion
The SBOX Max electrofusion welding machine gives you functionality, reliability and is capable of welding electrofusion fittings for gas, water and other pressure pipe applications from 20 - 630mm

Gator - Automatic Butt Fusion
The Gator range of automatic butt fusion machines have been designed and developed to be used on gas and water pressure polyethylene pipes for distribution networks. Various options available to weld pipe in the size range 63 - 400mm
